A Crucial Milestone Achieved for SKMCH&RC, Karachi: Physical Structure Completed

Constructed Area: 1 million sq. feet

State-of-the-art equipment for diagnosis and treatment of cancer

The physical structure of Pakistan's largest tertiary care cancer centre was completed in late-November, 2022. Finishing work has commenced and the installation of equipment will be carried out throughout the coming year. The hospital will be equipped with the latest in technology for both diagnosis and treatment, and will be staffed by highly-qualified professionals. It is expected that the hospital will open at the end of December, 2023, Inshallah, when it will continue the tradition of our hospitals in Lahore and in Peshawar by providing state-of-the-art cancer treatment free of charge to the underprivileged.

The long tradition of philanthropy in Karachi gives us great confidence that #KarachiCAN support us in building and running a dedicated cancer facility for the people not only of Karachi, but for all of Sindh, as well as for those coming from Southern Baluchistan. As the project nears completion, you can play your part by donating generously to help us in the battle against cancer.
